

Prolink FB Series

Prolink FB Series are enzymatic preparations based on transglutaminase enzyme (TG). Prolink FB Series TG solutions are specifically developed for cold raw fish binding applications (restructured fish products), where it efficiently links raw pieces and improves the quality of fish raw materials, allowing the desired shaping according to production needs and final consumer requests. The final reformed product has perfect slice-ability and excellent slice quality. Choose transglutaminase salmon from China transglutaminase manufacturer.

Restructured Fish Products

Initial cracked tuna fillet

Spread Prolink FB-FC powder or brush Prolink FB-FC slurry into the fillet cracks

Vacuum & Store overnight in chilled room

Result: Fixed fillet, quality whole cut

Restructured Tuna Cubes

Raw materials - cutoffs

Processing & Molding

Slicing

Final products

Cooked dish, heat-stable

Advantages:

1. Reform products with desired shapes
2. Effective meat binding, strong bonds between proteins
3. Improve slice-ability, reduce slice losses
4. Improve texture
5. The final reformed product can be frozen and cooked without losing shape or texture
